SANY AT BAUMA 2025 - MATERIAL HANDLING MACHINES

The next Generation of Material Handling Machines: SANY presents the new 40-Ton Material Handler SMHW40G5 for the first time at bauma 2025

Bedburg/Munich, February 2025 – At bauma 2025 in Munich, SANY will unveil its new 40-ton material handler, the SMHW40G5, for the first time. bauma is the world's leading trade fair for construction machinery, building material machines, mining machines, construction vehicles, and construction equipment, taking place from April 7 to April 13, 2025. At booth FN.619, spanning over 3,000 square meters, SANY will offer visitors the opportunity to experience this innovative machine live for the first time.

SANY is a globally leading manufacturer of construction machinery, material handling machines, and specialty vehicles. With years of experience and technological expertise, SANY develops high-performance, efficient, and durable machines for various industries. In material handling, factors such as high load capacity, stability, precision, and energy efficiency are crucial for economic and sustainable operation.

Equipped with cutting-edge technology, the new SMHW40G5 material handler sets new standards in efficiency, performance, and sustainability. Designed to meet the demanding requirements of scrap processing and heavy-duty material handling, this machine combines power, precision, and environmental friendliness.

Powerful Drive and Sustainable Technology

At the heart of this high-performance machine is the 6.7-liter Cummins Stage V diesel engine, delivering 168 kilowatts of power. The engine meets the latest environmental standards while offering reliability and fuel efficiency.

Maximum Reach and Precise Handling

With an extended 17-meter loading equipment, the 40-ton material handler is ideal for heavy loading, lifting, and sorting tasks. The machine has been specifically designed for use in demanding environments, ensuring maximum productivity and durability.

Key Features of the New SANY 40-Ton Material Handler:

- **Powerful Cummins Stage V Engine:** 6.7-liter displacement with 168 kW output for optimal power and environmental compatibility.
- **Extended 17-Meter Loading Equipment:** Ensuring efficient and precise material handling.
- **Perfect for Scrap Yards:** Robust construction for the toughest conditions.
- **Efficient Heavy-Duty Handling:** High capacity for faster work cycles and increased productivity.

World Premiere at bauma 2025

The official introduction of the new 40-ton material handler will take place at bauma 2025. Visitors will have the opportunity to experience the machine up close and discuss its innovative features with experts. With this new model, SANY once again demonstrates its expertise in developing powerful and environmentally friendly machines for heavy-duty and port material handling.

About SANY

SANY Europe is a company of SANY Heavy Industry from Changsha. This is one of the three largest manufacturers of construction machinery in the world, with a turnover - the SANY Group - of around 17.9 billion euros in 2024. Founded in 1989, the company offers a broad product portfolio with over 18 product families and more than 500 machine models. This is developed, realised and sold by almost 60,000 employees worldwide.

SANY's European site is in Bedburg, near Cologne, since 2011. The site employs staff in Sales, Service and in adapting products for the European market.

SANY Europe's portfolio focuses predominantly on excavators, port-machinery, cranes and road-machinery. The SANY site, measuring approximately 14 hectares, provides space for a production hall and warehouse. Proprietary painting facilities, as well as an administration building and the SANY Hotel are also located on the premises.

The internationally recognised brand Putzmeister, based in Aichtal near Stuttgart is also a company of SANY Heavy Industry.
